Volunteers Needed for Research Study

Investigating the Psycho-Physiological Effects of Floatation in Adults

The Brain Institute is conducting research to explore the neurological and physiological effects of the float pod.

Age requirement: 18~80 years old.

You will be asked to float in a sensory deprivation tank, lay supine on a bed and complete a cognitive task. The participation takes 2 to 3 hours in total and it will take place at the Brain Institute located at 14725 Alton Parkway, Irvine, CA 92618.

Benefits: This research will lead us to a greater understanding on the effects of float pods and your potential to be a natural alternative to treatment of stress.

Please email tlan@chapman.edu with any questions.
