

VOLUNTEERS NEEDED FOR RESEARCH STUDY

Human reactivity to perceptual stimuli of liminal intensities: an EMG study

- Our team at the Brain Institute at Chapman University is currently seeking participants for a study on perception, reaction times, and stimuli discrimination abilities.
- All participants must be legal adults (18 years of age or older) and Chapman students.
- We would like to measure your cognitive performance, such as reaction times or the ability to recognize stimuli. We may also measure some physiological signals such as the electrical activity of your muscles (EMG), brain (EEG), or eyes (EOG). All recordings are non-invasive. There are no risks involved in this research.
- Participation will take up to two hours. The study will take place in person at the Brain Institute at Chapman University (561 N. Glassell, Orange)
- Participants have the possibility of obtaining SONA research credits for their involvement; otherwise, participants will be financially compensated.
- If you are interested in participating or have any questions, please email: mshaw@chapman.edu
